

# Our library has TODAY'S SCIENCE

Perfect for research and understanding what's happening in science today. Features interviews with scientists, scientific breakthroughs, and much more.

The collage features several scientific images: a large, textured orange worm-like structure on the left; a bright sun in the top center; a blue fingerprint scan in the top right; a snake in the top right; a scientist in a lab coat and safety glasses pouring liquid into a flask in the middle left; and a microscopic view of a cell in the bottom left.

The screenshot shows the 'Today's Science' website interface. At the top, there is a navigation bar with 'Topic Index', 'Resources', and a search box. The main content area features a featured article titled 'Can Magnets Make Football Safer?' by Abe Sorber, dated January 2015. Below this are two other articles: 'Graphene Comes of Age' by Catherine Nisbett Becker, and 'Marks on a Shell: Ancient Masterpiece?' by Patricia Waldron. On the right side, there are sections for 'Video News Briefs' and 'Conversations with Scientists'.

ACCESS INSTRUCTIONS: Check our library's Web site or contact a librarian for the link to *Today's Science*. If prompted to log in, please input the login details above.
